Learning Object-Oriented Programming, Design with TDD in Pharo

Stéphane Ducasse, Damien Pollet

Pharo is a clean, innovative, open-source, live-programming environment.

Learning Object-Oriented Programming, Design with TDD in Pharo teaches object-oriented programming, Test-Driven Development and object-oriented design. Pharo's minimal object model makes it the ideal place to focus on the key conceptual elements.

Including:

- Objects, classes, messages and methods
- self, super and inheritance
- Delegation and polymorphism
- The "Don't ask, tell" principle
- Tests and software refactorings

Get it, it's open!
