Pharo by Example 9

Stéphane Ducasse, Gordana Rakic,
Sebastian Kaplar, Quentin Ducasse

Pharo is a clean, innovative, open-source, live-programming environment.

Pharo by Example 9 (2022 edition) is the third edition of Pharo by Example, based on Pharo 9. It covers all the elements of the language, the core libraries and the IDE, starting with a first-contact chapter where you build, test and save a simple counter.

Including:

- A tour of Pharo, its syntax and its object model
- Collections, streams and iterators
- SUnit, Iceberg and package management
- Traits
- Metaclasses and reflection

Get it, it's open!
