Application Building with Spec 2

Koen De Hondt, Stéphane Ducasse, Esteban Lorenzano, Sebastian Jordan Montaño

Pharo is a clean, innovative, open-source, live-programming environment.

Spec is the default UI framework of Pharo, built around the Model View Presenter pattern. **Application Building with Spec 2.0** shows how to build and reuse UIs in Pharo 12, independently of the widget toolkit (GTK, Morphic, Toplo).

Get it, it's open!

books.pharo.org/BuildingApplicationsWithSpec

Including:

- A tutorial to get started in 20 minutes
- Presenters and the Model View Presenter pattern
- Layouts and dynamic widget building
- Transmissions and commands
- A minimal email client using all Spec 2.0 features
