Testing in Pharo

Stéphane Ducasse, Guillermo Polito, Juan Pablo Sandoval

Pharo is a clean, innovative, open-source, live-programming environment.

Testing in Pharo (2023 edition) presents in depth how to write tests in Pharo: the SUnit framework, its core features and extensions, web testing, and the Xtreme Test-Driven Development flow, a killer feature of Pharo.

Including:

- SUnit and its core features
- Example-driven tests
- Simple mocks
- Web testing with Parasol and Selenium
- Xtreme Test-Driven Development

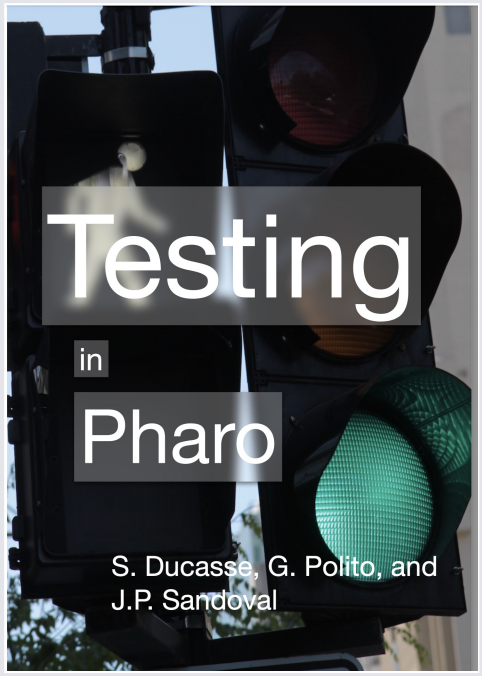

Get it, it's open!
